ABOUT P20W

P20W is a system that uses existing data to help support a better understanding of program outcomes, state investments, and how services inter-relate. The system, which operates under the MERIC team within DHEWD, is a result of over a decade of research and extensive collaboration with other state agencies, university researchers, and ITSD. While P20W depends on other partner agencies' internal systems, it does not replace them and does not require new data from schools or agency partners.

BENEFITS

- Data are de-identified; privacy and confidentiality are paramount
- Provides better visibility and understanding of the talent pipeline and workforce development opportunities
- Utilizes collaborative Data Governance to ensure responsible use that guarantees privacy protections
- Supports additional grant and non-profit funding opportunities
- Links longitudinal data to help better understand the education-to-workforce journey over time
- Helps Missourians make informed decisions about education and training pathways

P20W RESEARCH FOCUS

- Outcomes of high school graduates, including career and technical education
- Outcomes of higher education enrollees and graduates
- Employment trends
- Post-incarceration trends and outcomes
- Workforce training and registered apprenticeships

MoSCORES

MoSCORES is an online resource that allows users to search for postsecondary education and training programs across the state, including traditional credit programs, non-credit, and workforce training and technical programs.

This tool also allows users to download search results and provides visual displays highlighting enrollment, earnings, and employment options for selected programs. Explore MoSCORES at **https://meric.mo.gov/data/moscores.**

NEXT STEPS FOR 2025

- Continue data integration with DESE and other workforce and social services partners
- Renew multi-agency data sharing agreement
- Research and program evaluation with agency partners
